

ĐỀ SỐ 3

1. What would this script do?

- A. Generates a random colour each time it is called
- B. Picks a red colour
- C. Clear a random colour
- D. Print a random colour
- E. None of the above

Refer to the following code for question 2 and 3

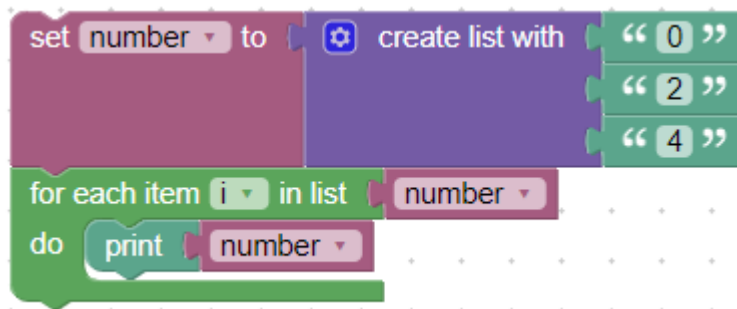

2. What would above script do?
- A. Prints 5 random integer from 1 to 100
 - B. Prints a random integer from 1 to 100
 - C. Prints an integer from 1 to 100 and
 - D. Prints a random integer from 5 to 100
 - E. None of the above

3. What's the output of the following scripts? Is it get the same result?

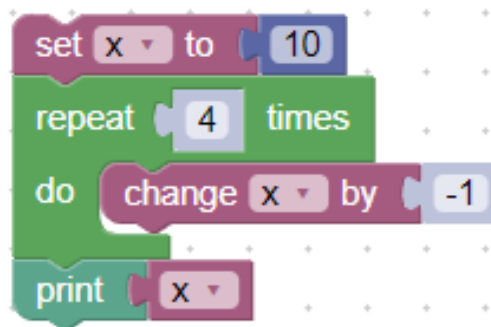

- A. Yes, they are the same
 - B. No, this script prints 5 times of a random integer from 1 to 100
 - C. This script couldn't run
 - D. No, this script calculates sum of 1 and 5
 - E. None of the above
4. How many times is the "print" command executed?

- A. 0
- B. 1
- C. 2
- D. 3
- E. None of the above

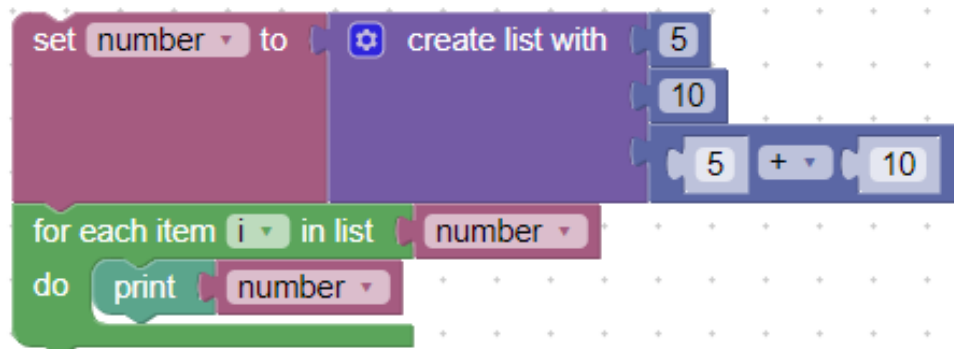

5. What is “i”?
- A. Counting how many times the green loop repeats
 - B. A variable
 - C. 0, it is always 0
 - D. Counting how many blocks in the code
 - E. None of the above

6. What’s the expected result of “x”?

- A. 10
- B. 6
- C. -1
- D. 4
- E. None of the above

Refer to the following code for question 7 and 8

7. The first line of output is 5, 10, 15. What is the second line of output? Why?
- A. i. Because random integer would not repeat
 - B. 2. Because this is the second time the for loop
 - C. Undetermined because number cannot be predicted
 - D. 3 because length of number is 3
 - E. None of the above

8. What's the length of "number"?
- A. 5
 - B. 10
 - C. 15
 - D. 3
 - E. None of the above

9. Refer to the following code

What is the expected results?

- A. It's can be from 1 to 10
- B. 1
- C. 3
- D. 8 because this is the third time the loop repeats
- E. None of the above

10. The following code is executed but there is no output, why?

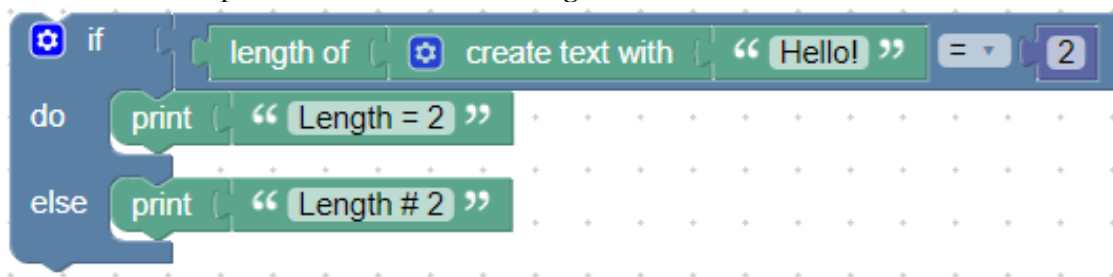

- A. Picking random integer from a negative range causes error in Blockly
- B. The content for printing is not defined
- C. Repeat 5 times is never happening because "random integer from 1 to 20" is exclusive
- D. k is undefined
- E. None of the above

11. What would be printed?

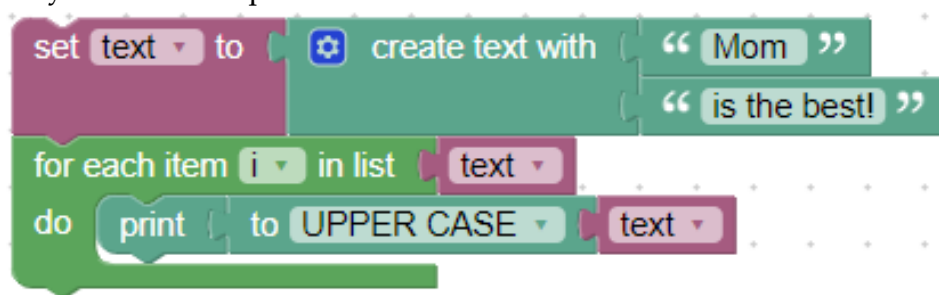

- A. Blockly
- B. G
- C. Google
- D. Blockly, Google
- E. None of the above

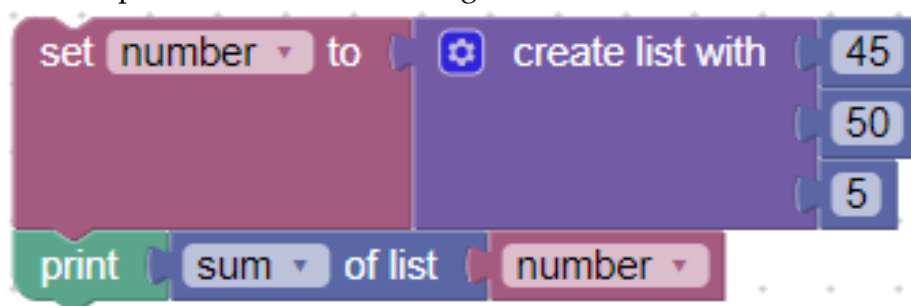

12. What would be printed with the following code executed?

- A. Hello
B. 2
C. Length = 2
D. Length # 2
E. None of the above
13. How many times is the "print" command executed?

- A. Equal to length of "text"
B. 2
C. Equal to length of "i"
D. 5
E. None of the above
14. What would be printed with the following code executed?

- A. 45
B. 50
C. 5
D. 100
E. None of the above

15. Following is a block and the respective code. What is the output?

```
set text to create text with "Do"
                           "you"
                           "like"
to text append text "Blockly?"
print text
```

- A. Blockly?
B. ?
C. The code generates error
D. Do you like Blockly?
E. None of the above

16. What would be printed?

```
set list to create text with "Hello"
to list append text "World!"
print in text list find last occurrence of text "o"
```

- A. 3
B. 5
C. 7
D. 8
E. None of the above

17. What is the final value of "item"?

```
set list to create text with "Hello"
to list append text "World!"
set item to "New"
to item append text in text list get substring from letter # 6 to last letter
print item
```

- A. Hello
B. New
C. New World!
D. Hello World!
E. None of the above

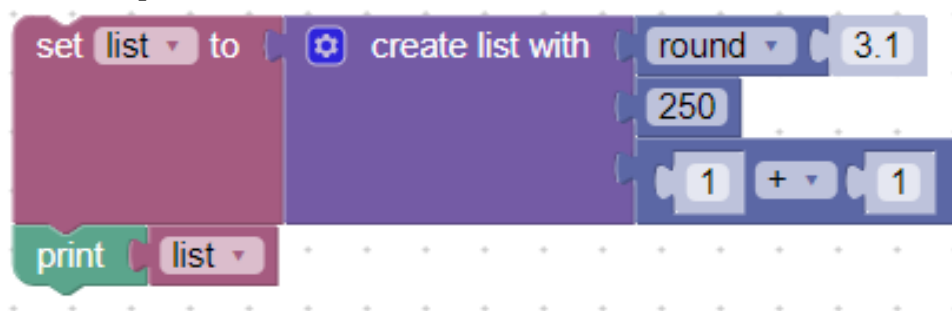

Refer to the following code for question 18 and 19

```
set x to 125
set y to x ÷ 5
print y
```

18. What's the value of "x"?
- A. 5
 - B. 25
 - C. 125
 - D. Both A and B
 - E. None of the above

19. What's the value of "y"?
- A. 5
 - B. 25
 - C. 125
 - D. Both A and B
 - E. None of the above

20. What would be printed?

- A. 3.1,250,1+1
- B. 3.1,250,1
- C. 3,250,1,1
- D. 3,250, 2
- E. None of the above
